COM Students Mentoring Public School Students
More than 85 COM I-IV's are currently serving as mentors to Cincinnati Public School students in grades K-12, and they have committed to doing so throughout their enrollment in the COM. This commitment is even more remarkable in light of the strenuous load the med students carry. The group is known as the UC Med Mentors, and they just received a $1,000 grant from the Charles H. Dater Foundation to be used for their activities. They're making us all proud with their example.
