Comments for 160176 Pediatric Radiology

2 or 3 Strengths of this elective?
- Excellent educators, Childrens was awesome!
- Children's hospital is an amazing facility. Excellent instructors/radiologists. Diverse pathology. All of the lectures and case conferences were fantastic. Great flexibility with scheduling, can focus on personal radiology interests.
- Great learning about radiology and many subspecialty conference opportunities leading to ample learning. I feel much better prepared to interpret films on my own and know when to consult radiology when faced with uncertain clinical findings. Dr. Ostreich’s teaching was particularly valuable.
- I learned a lot from Dr. Babcock and Dr. Oestreich and the power point presentations given by various faculty in the afternoons was very educational as well. I feel that this rotation will really help me as a pediatrics intern starting in July.
- Allows student to customize the weekly schedule to their interests.
- Good didactic teaching on plain film radiography.
- organized
  -great exposure
  -great teaching
  -great autonomy to explore interest
- faculty easily approachable and eager to teach
  -great variety cases
  -lectures were very helpful

Comments for 160176 Pediatric Radiology

2 or 3 Areas Needing Improvement?
- would be helpful to get info on the rotation prior to starting
- N/A
- Nothing, it was a fantastic elective.
- None, great elective for fourth years interested in pediatrics or radiology.
- brief email introducing the course and instructions where to be prior to start date
